Dear Mr Weisberg,

I read your Whitewash IV. The arguing (blobber) of the Bunch of scard rabbits of of the W. commission in vomiting. It is childish to expect from any Gov't service to say that such a man was an informer. The Warren report was produced with a pistol in the back by some powerful organization. Doubt that Moscow was behind; they wouldn't be interested later to murder RFK, King and Wallace (injured). Only Thomas Buchanan in his book points who could be behind. It is naive to appeal to the gov't to reopen the investigation - there were in Kohut. In your Whitewash I you show exhibit 385-86-97. People must use their brains to get a conclusion. Most of the people ~~have~~ are without ~~not~~ brains. So the presentation of the trajectory of the magic bullet would show clearer the absurdity of the faked W-report. In U.S. history were at least 2 other gov't monstrosity - "Olympia" blown up (by U.S.) in Havana harbor in 1988 with loss of 300 people to work up the public opinion and let happen the attack on Pearl Harbor with loss of several thousands lives. Only an idiot or child can believe that Wash. knew nothing about approaching Jap. Fleet.

M. K.

This is just one example how our so called "Free" press screws up the U.S. Suckers. Few lines in N.Y. Times mean nothing to the readers. On a graph like I made one it is a different story. I discontinued my subscription to Time, News Week, U.S. & world reports for refusing to print the diagram. Same applys to "magic bullet trajectory like I reproduced from British printed JFK "assassination Kit".
